

STANDARD REFERENCE COPY — APPLIES BEFORE A PROJECT-SPECIFIC AGREEMENT IS SIGNED

License Agreement

A plain-language explanation of what you own, what ZypherixLabs retains, and how licensing works across our Starter, Standard, and Complete packages. The signed, project-specific version of this agreement is issued once your package is confirmed.

1 Overview

Every ZypherixLabs project is delivered under one of three license tiers, matched to the package you choose. This document explains those tiers in general terms. A completed copy naming your specific project is signed by both parties before work begins.

2 Tier A — Standard Build License

Applies to Starter and Standard packages. You own all content, text, images, and branding you supply. ZypherixLabs retains ownership of the underlying code framework, reusable components, and design system used to build the site, and grants you a perpetual, non-exclusive license to use the delivered site for your own business. The underlying framework may not be resold or repurposed as a template for third parties.

3 Tier B — Full Ownership Transfer

Applies to the Complete package (buyout). Upon full and final payment, ZypherixLabs transfers full ownership of all custom code, design files, and content created for your project, with no ongoing license restriction. ZypherixLabs retains the right to reference the project in its own portfolio and marketing unless you request otherwise in writing.

4 Tier C — Managed License

Applies where ZypherixLabs hosts and maintains your site under an active maintenance retainer. You have full usage rights to the live site and its content for as long as the retainer is active. If the retainer lapses or is cancelled, ZypherixLabs hands over a complete copy of the site and its assets within 14 days of a written request, and the license converts to Tier A terms.

5 Ownership Before Full Payment

Regardless of tier, source files, code, and the live deployment remain the property of ZypherixLabs until the relevant invoice is paid in full. Domain names registered on your behalf are registered in your name from the outset.

6 Third-Party Components

Where a site uses third-party plugins, libraries, fonts, stock imagery, or paid services (payment gateways, hosting), those components remain subject to their own licenses and terms, which you are responsible for maintaining after handover unless covered by an active maintenance retainer.

7 Warranty & Support Window

Each package includes a post-launch support period (see the current Pricing Brief) during which ZypherixLabs fixes defects in the delivered work at no extra charge. New features, out-of-scope content changes, and issues caused by third-party outages fall outside this warranty and are billed at standard rates or covered under a maintenance retainer.

8 Governing Terms

This overview is read together with the ZypherixLabs Standard Terms & Conditions and, once signed, your project-specific License Agreement. Where documents conflict on licensing matters, the signed, project-specific agreement governs.

This is a standard, client-facing reference copy. It is not a substitute for the signed, project-specific License Agreement issued with your quote.
